

ORI BARAM – RESUME

My name is **Ori Baram**. I am a Junior Web Developer specializing in **front end web development**.

I am well-versed in the following programming languages and technologies: **JavaScript, HTML, CSS, Bootstrap, Sass, ReactJS, Redux, Redux-Saga, Git & Node.js**.

I have a strong passion for programming. I am hardworking and dedicated, autodidact, eager to learn, develop and apply new technologies. Looking for my foothold in the world of programming. I have built over 40 projects as part of my learning process.

Skill Highlights

- Self-disciplined
- Fast learner
- Autonomous work capabilities
- Out of the box thinker
- Complex problems solver
- Creative thinker
- Great team player
- Positive attitude
- Hardworking
- Excellent interpersonal skills
- Great communication skills
- Excellent hands-on development skills
- Self-driven, extremely motivated
- Committed and proactive
- Attention to details

Technical Skills

- HTML5
- CSS3, CSS Grid, Sass
- JavaScript
- ReactJS, Hooks
- Node.JS, Mongo DB, Express
- Frontend & Backend
- End2END
- Redux-Saga
- Algorithms & Data structures

Languages

Hebrew – Native language
English – Native language level
(South African origin)

Programming Experience

Zetz Shop - eCommerce platform built with the MERN stack

- Technologies used in the project: React, Bootswatch, Redux, Node.js, Mongo DB, Mongoose, Express, Bcrypt, Json web token, Multer, Nodemon, Axios, Concurrently, Redux-Thunk.
- Features: Shopping cart, product reviews, top products carousel, pagination, product search, user profile with orders, admin product, user & orders management, mark orders as delivered option, checkout process and PayPal / credit card integration.
- To GitHub repository - <https://github.com/obrm/zetz-shop>
- To website - <https://obrm-zetz-shop.herokuapp.com>
- The project was built as part of the course "MERN eCommerce From Scratch" in Udemy.

Dev Home - A Social Network MERN Stack Application For Developers

- Technologies used in the project: React, Redux, Node.js, Mongo DB, Mongoose, Express, Bcrypt, Json web token, Nodemon, Axios, Concurrently, Redux-Thunk.
- Features: A Social Network That Includes Authentication, Profiles and Forum Posts.
- To GitHub repository - <https://github.com/obrm/dev-home>
- To website - <https://obrm-dev-home.herokuapp.com>
- The project was built as part of the course "MERN Stack Front To Back" in Udemy.

Hero Weather - React weather app with the AccuWeather API

- Technologies used in the project: React, Hooks, React Router DOM, Styled-Components, React-Bootstrap, Bootswatch, Local Storage, Redux, Redux-Saga, & Geolocation-API.
- Features: Current weather of current location, search cities with auto complete and display their weather, save favorites to local storage, Dark & light mode.
- To GitHub repository - <https://github.com/obrm/hero-weather-redux-saga>
- To website - <https://obrm-hero-weather.netlify.app>

The rest of my projects can be seen in my portfolio website - <https://www.obrm-portfolio.dev>

Created a full featured commercial SaaS web system for Greeneye company as a freelance

- Implemented a no code tool called Bubble.io to build all by myself a full featured web system for evaluating companies which are traded in the stock market.
- Planned, characterized, designed, built and implemented this project all on my own.
- The system includes a full featured administrator interface and a rich client interface.
- Visit the demo of project - <https://greeneve-demo.bubbleapps.io/version-test>

Job Experience

Information-systems support in Ra'anana municipality

- Information-systems support, remote control, user training, troubleshooting information-systems issues, ongoing work with Active Directory.

Client Backoffice Operations in the field of life insurance and pensions at various insurance companies

- Ongoing care and management of pension portfolios and life insurance of companies.
- Ongoing work with Excel - analysis and processing of complex data - pivot tables, VLOOKUP, Macros, VB and other complex Excel functions.

System implementation at Ichilov Hospital

- Training, implementing, testing, characterizing, and giving technical support for the "Birth care" medical information-management system, in a variety of departments in the hospital.
- Administrator who handles authorizations, characterizations, version checks, etc.
